

**Inovor Technologies Internship
2021-22
Application Pack**

Thanks for your interest in an Inovor Technologies Internship

We believe Australian talent rivals the best in the world, and we're building the satellites to prove it!

Each year, we offer a comprehensive internship experience to a small number of ambitious applicants who are ready to launch a career in Australia's growing space sector.

For three months (December-February), interns work alongside our experienced engineers on a space-related project and undertake activities to prepare them for a career in the Australian space industry.

About the application process

We take the selection process for our internships very seriously. In fact, many of our current team members began their career as an Inovor intern.

Please be aware that the demand for our internships is incredibly high.

While we would love to say 'YES' to every person who wants to launch their space career with us, we unfortunately can't accommodate everyone.

We rely on our robust application process to choose interns who we believe will be the right fit for our company. We're always busy – but never so busy that we can't nurture amazing talent.

All aspiring interns are asked to follow the process outlined in this pack to progress their application.

Who can apply?

We only accept internship applications from people who are:

- Australian citizens; **and**
- currently studying at an Australian university or who have completed a university level degree.

If we decide to progress your application, you will be asked to provide evidence of your Australian citizenship and university scores/grades. We may ask for evidence of other things you mention in your application, and we will also contact your referees.

How to apply

See the example application within this pack. Please follow the example and do not exceed two pages.

Email your completed two-page application as a PDF file to info@inovor.com by **22.00 on Sunday 29 August 2021**. You may attach a photo or two as indicated in the example application.

If we think you'll be a good fit, you will get the opportunity to demonstrate your talents at an interview (face-to-face or remotely) during September.

Successful applicants

Internships run from December 2021 to February 2022 although we will consider longer/shorter internships depending on your individual circumstances.

Good luck! 

Inovor Technologies Internship Application

Your name

Your preferred name (*optional*)

Your pronouns (*optional*)

Your contact details

- home address (and postal address if it's different)
- mobile
- email.

I am an Australian citizen. [**we only accept applications from Australian citizens**]

I studied <name of your degree> at <university name and location> or I am studying <name of your degree> at <university name and location>.

I graduated in <year> or I will graduate in <year>.

My Grade Point Average (GPA) is <insert> or was <insert>.

I am not currently working / I currently work as a <insert occupation> at <insert business name>. In this role, I am responsible for <insert responsibilities>.

I am applying for a <Mechanical / Software / Modelling & Simulation / Electrical / Systems / Other – tell us your proposal> internship.

I am available to participate in the three-month internship from the beginning of December 2021 to the end of February 2022 (with a break over Christmas/New Year). [If not, please specify your availability or whether your university requires a longer period]

1. Please tell us why you want an internship at Inovor Technologies including what you want to learn and the skills you will bring:
